☎ +91-6377257649  <https://github.com/drjayaswal>

Motivated Backend Developer with a mindset for building scalable tech. I'm a fast learner focused on staying ahead in this evolving market. Currently deepening my skills in DevOps and GenAI to ensure I'm always building for the future times.

WORK EXPERIENCE

April 2025 - July 2025

Coadal Virtualwave Pvt. Ltd | Fullstack Developer Intern

- Designed and developed secure backend APIs using Elysia, Bun, and Drizzle ORM, integrating authentication and payment gateways.
- Managed storage with AWS S3, optimising performance and ensuring public access configurations.
- Implemented scalable data solutions with PostgreSQL & MongoDB, and containerised services using Docker.

April 2025 - July 2025

Celebal Technologies | Backend Developer Intern

- Built and optimised RESTful APIs using Node, Express, and integrated third-party APIs.
- Implemented authentication and authorization workflows using JWT, enhancing security.

PROJECTS

Mainline | Personal Email Assistant  [mainline](#) | [Github](#)

- "Bring Your Own Key" (BYOK) which prioritizes data sovereignty by allowing users to provide their own encryption keys, ensuring that all analysis remains private, secure, and fully encrypted at rest.
- Acts as a central intelligence hub by seamlessly connecting to external platforms like Monday, Jira, Gmail, and more.
- High-Performance RAG & Analysis: Leverages Next, React and Drizzle ORM to process multi-format document data, providing deep, actionable insights through a robust RAG pipeline.

Alluvium | Full-Stack GenAI Platform  [alluvium](#) | [Github](#)

- Developed a responsive Next, React, Tailwind, and Radix UI, featuring complex data visualizations with recharts, and seamless Google Drive integration.
- Engineered a high-performance FastAPI backend featuring PGVector for semantic search, Redis caching, and secure JWT auth, integrated with AWS/Google APIs for automated document processing.
- Developed a RAG pipeline using LangChain and ChromaDB, utilizing Sentence-Transformers and SpaCy to extract insights from multi-format documents and YouTube transcripts and using Docker and managed cloud storage/integration via AWS .

Xegality | Legal Assistance Platform  [xegality](#) | [Github](#)

- Designed a full-stack legal consultation platform enabling efficient attorney-client interactions.
- Integrated PostgreSQL and JWT authentication to handle secure user sessions.
- Leveraged AWS S3 for scalable, highly-available multi-media data storage and utilized Docker for standardized containerization and deployment.

SKILLS

Fullstack Next | React | Shadcn | TypeScript | JavaScript | Tailwind | Zod | Boto3 | Redis | PostgreSQL | nginx
Mongoose | Numpy | Drizzle | Bcrypt | FastAPI | Uvicorn | SQLAlchemy | rabbitMQ

Devops & GenAI Docker | AWS | Python | ChromaDB | HuggingFace | Langchain | Spacy | NLTK | Numpy
Sentence-transformers | Scikit-learn

EDUCATION

Poornima University - 2022 – 2026
Bachelor of Technology – CGPA: 8.49

DAV Centenary Public School - 2014 – 2021
Senior & Senior Secondary Education – Percentage: 84%

CERTIFICATES

Javascript - Hackerrank - 2024	ReactJS - Scaler & Hackerrank - 2024	FullStack - Meta - 2024
NodeJS - Simplilearn - 2024	MongoDB - MongoDB - 2024	DSA - Scaler - 2025
Developer - Celebal - 2025	Developer - Coadal - 2025
